PATIENT CARE EXPANSION UPDATE

Less Wait, Less Travel, More Access to Exceptional Healthcare

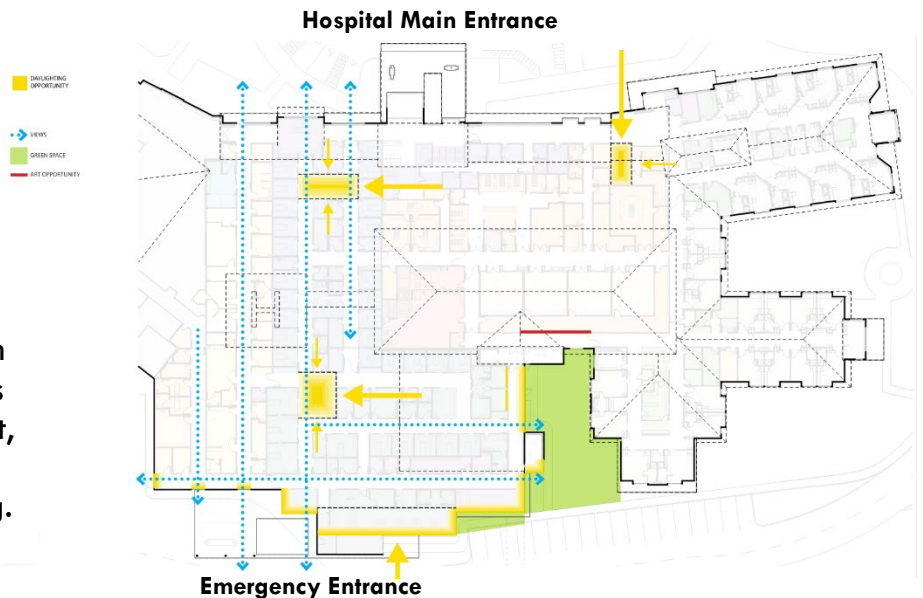

June 16, 2024 Update

Design & Space Planning Updates

- We have received preliminary 3D renderings, which demonstrate how **natural light & views** could be incorporated into new and existing spaces (research-based biophilic design principles = which are part of our Pullman Regional Aesthetic Guidelines)

In these preliminary concepts, blue denotes skylights and windows in new and existing spaces to introduce natural light, which promote productivity and healing.
