RESIDENCY

TRAINING FUTURE PHYSICIANS

Pullman Regional Hospital and Washington State University's Elson S. Floyd College of Medicine have partnered to establish the Family Medicine Residency Program where resident physicians spend three years at Pullman Regional to complete their medical training.

Resident physicians receive training in neurology, cardiology, orthopedics, obstetrics, pediatrics, emergency care and surgery in addition to seeing patients regularly in the Family Medicine Residency Center. With more than 500 applicants competing for three positions annually, Pullman Regional Hospital is a desirable choice for resident physicians wishing to pursue rural medicine in our region.

FOCUSED ON RURAL HEALTHCARE

Training medical learners like our family medicine residents elevates everyone's level of care as we are more careful to teach and practice the most up-to-date evidence-based medicine.

- Dr. Stephen Hall,

Program Director, WSU Family
Medicine Residency Program

PHILANTHROPIC SUPPORT OF THE FAMILY MEDICINE RESIDENCY PROGRAM **WILL PROVIDE:**

LEADERSHIP

Faculty leadership helps educate, train, recruit and retain the best resident physicians who have an interest in rural medicine.

SUSTAINABILITY

Educational and training experiences of resident physicians will be carried out now and into the future.

ACCESS

More than half of residents stay and continue to practice in the same state of their residency program.
